

Maximol

PRODUCT DATA SHEET

Maximol Solutions is one of the world's leading mineral food supplements containing a unique blend of no less than 52 minerals and trace minerals (patented as the Maximol Mineral Matrix™) also featuring essential B-vitamins, amino acids, phytochemicals and a pre-biotic.

MAXIMOL MINERAL MATRIX™

- ▶ 52 macro, micro and trace minerals.
- ▶ Sourced from the Great Salt Lake.
- ▶ Ionic suspension optimises bio-availability and stability.

AMINO ACIDS

- ▶ Individual amino acids blended to Neways' precise requirements.
- ▶ Sourced from non-GMO components.

FRUIT-BASED ANTIOXIDANTS

- ▶ Naturally-sourced fruit extracts Blueberry Juice and Raspberry Juice .
- ▶ High ORAC (Oxygen Radical Absorption Capacity) fruit blend.

SYNERGISTIC FORMULA SUPPORT

- ▶ B-Vitamin profile including B2,B3,B6 and Biotin optimises bio-availability and mineral stability.
- ▶ Black Carrot Powder containing anthocyanin pigments.
- ▶ Inulin – prebiotic component supporting bio-availability and growth of beneficial gut bacteria.

Directions:

Drink 15ml once daily mixed with 30 ml juice or water.

Available in 500ml size.

Suitable for vegans and vegetarians.

Item Code 1835GB

Caution: Contains Sugar.

Full Ingredient list:

Water, Blueberry Juice from Concentrate, Raspberry Juice from Concentrate, Sucrose, Calcium Lactate, Magnesium Chloride, Acidity Regulator Hydrochloric Acid, High ORAC Fruit Blend (extracts, concentrates and powders of Grape Seeds, Strawberries, Oranges, Wild Blueberries), Berry Flavor, Inulin, Potassium Chloride, Black Carrot Powder, Amino Acid Blend (L-Leucine, L-Isoleucine, L-Valine, L-Alanine, L-Arginine, L-Aspartic Acid, L-Lysine, L-Proline, L-Serine, L-Threonine, L-Histidine, L-Methionine, L-Ornithine), Ferrous Sulfate, Preservative Sodium Benzoate, Zinc Sulfate, Biotin, Niacinamide, Copper Gluconate, Manganese Chloride, Sea Salt, Pyridoxine Hydrochloride, Chromium (III) Chloride, Riboflavin, Sodium Molybdate, Sodium Selenate, Potassium Iodide.

Maximol
SOLUTIONS

SUPPLEMENTARY INFORMATION

Macrominerals: Essentially macrominerals are those minerals required in larger amounts (often defined as a daily requirement exceeding 100mg). *Maximol Solutions includes:*

- ▶ Calcium – to help support healthy bones, cell membranes and neuro-muscular activity.
- ▶ Magnesium – To help support muscle and nerve structure, and regulation of other minerals.
- ▶ Potassium – Supports a healthy cardio-vascular system and other body functions.

Microminerals - required in smaller amounts (often defined as a daily requirement below 100mg per day). *Maximol Solutions includes:*

- ▶ Iodine – To support the hormone system.
- ▶ Selenium – a potent antioxidant to support the immune system.
- ▶ Manganese – to support antioxidant enzymes.
- ▶ Copper – an important mineral supplement for vegetarians, supporting cellular health.
- ▶ Iron – Supports delivery of oxygen to the cells.
- ▶ Zinc – Encourages cellular health and supports immune function.
- ▶ Chromium – To support blood glucose and lipid levels.
- ▶ Molybdenum - essential for proper enzyme function and supports nervous system development.

Trace Elements – These are minerals required in minute quantities (normally less than 1mg per day) but they still provide essential support to the body. Maximol Solutions sources its minerals from a natural source rich in various trace elements, the Great Salt Lake in Utah which differentiates it from many of the more synthesised formulation options available. Trace elements present in Maximol include silicon, silver, lithium, phosphorous, boron, gold, and vanadium.

For a complete listing of all the minerals in Maximol Solutions, visit www.newaysscience.com

ORAC (Oxygen Radical Absorbance Capacity) - An industry-standard assessment for measuring anti-oxidant activity. Maximol contains a specifically formulated high ORAC/phytonutrient fruit blend including extracts of grape seeds, strawberries, orange and wild blueberries, supported by blueberry and raspberry concentrates. The diversity of these ingredients and the enhanced ORAC score provides a broad profile for basic antioxidant support.

Amino Acids - Essential amino acids cannot be manufactured by the body and must be supplied daily. Production of non-essential amino acids by the body is aided by proper nutrition. This version of Maximol features an all-new amino acid blend, formulated to precisely complement the other elements of the formulation.

B-Vitamins - An essential supporting role. Vitamins B2, B3, B6 and biotin support a wide variety of body functions and play an essential role in optimising the synergy and stability of the Maximol formula.

Inulin - an important prebiotic component that aids the absorption of Maximol's nutrients, plus it provides prebiotic food to sustain healthy gut flora and support intestinal health.
